The Beginning : Our association with steel industry is four decades strong. We started our journey by fabrication of steel Kamani Shokkers under the brand name of KAMAL SPRING WORKS. Our first manufacturing facility was setup in Haiderpur Industrial area, Delhi in 1982. We started from scratch with a bare investment of rupees 5000. In very short span of time our engineered product and rigorous quality measures earned us a monopoly in Indian spring market and soon our demand surpassed our production. This journey continued for long and we gradually diversified into General Steel fabrication.

The Journey : It was in year 2015, when we decided to venture into the field of Pre Engineered Buildings and laid the stone of Kaizen Steel Building Solutions Pvt. Ltd. Year 2017 was a game changer, when Mr. Shivank Garg completed his B.Tech in Mechanical Engineering from IIT- Kanpur & spearheaded Operations. Another major boost was given when Mr. Shivam S Garg joined in 2018 after earning his B.Tech in Electrical Engineering and revolutionized company's production processes. We started our production activities in a 40,000 sq ft Plant located in Mundka Industrial Area, Delhi with an annual capacity of 4000 MT. We also faced many challenges being new into the PEB Industry due to competition by established players, COVID and extreme volatility in prices of raw material. But our internal policies, business ethics and Quality workmanship earned us multiple repetitive orders and "KAIZEN" name started gaining popularity in the market. Our reputation stood ahead of our marketing campaign. To meet the growing demand for KAIZEN Projects, we installed one more Production facility in 2019 with the annual capacity of 6000 MT.

The Rise : The Blessings of our Clients and our NEVER SETTLE Attitude did not allow us to stop here, so we planted the seeds for a 2,50,000 sq ft. large state of the Art facility equipped with the most advanced machineries from all over the world. Dedication, unshaken commitment and sleepless nights of hundreds of KAIZEN FAMILY members fulfilled this dream in 2022. This facility is located in Sonipat, Haryana and boasts of annual capacity of 24000 MT.

The Future : With Immense Pleasure , we are glad to share that KAIZEN has gone International. Our first International office has been inaugurated in 2022 in RAK Economic Zone, Dubai, UAE with an aim to satisfy the PEB demands around the globe. Soon we are also planning to expand into African Countries and Middle East. Our upcoming facility spanning 3,50,000 sqft. is under construction in Sonipat and expected to be fully operational by 2024.

I welcome you to Kaizen Smartbuild!

We have created this company on the four pillars of hard work, integrity, adaptability and excellence. Over the years kaizen has come a long way in contributing to the structural requirement of India. The growth of our company is based on an efficient organisation and entrepreneurial management.

SANJEEV GARG

STATE-OF-THE-ART

MANUFACTURING FACILITY

Kaizen Smartbuild's 2,50,000 Sq.Ft. State-of-the-Art manufacturing plant is equipped with latest machines. We owe our success to our infrastructural base. All manufacturing activities are carried under one roof. Our workforce consists of numerous skilled engineers technicians, management personnel and other technical and non technical workers who give us an added edge over others.

TOTAL QUALITY MANAGEMENT

Total Quality Management (TQM) is a theory of management the purpose of which is to improve an organisations ability to deliver quality to its customer on a continuously improving basis.

PDCA CYCLE

PDCA is a step management method used in business for the control and continuous improvement of processes & products.

At Kaizen, we consider it as an effective tool which has improved our product & procedure for manufacturing it via continuous feedback from client and inter departments.

STRENGTH & SAFETY

At **Kaizen Smartbuild**, the safety of employees is paramount. Training on safety is conducted at regular intervals and in addition, safety manager is deployed at every unit to ensure maximum safety.

GREEN INITIATIVE

BY KAIZEN SMARTBUILD

The demand of green building has increased in recent times. People across the various sectors are concerned with sustainable goals. It has been observed that building consume a major portion of resources and energy. By opting pre engineered steel buildings we are protecting our environment.

Recyclable

Steel is the main component that is used in the construction of pre engineered buildings. It eliminates the harmful effects associated with concrete & cement. Steel is 100% recyclable.

Heat Island Effect

Kaizen Smartbuild uses metal roof panels that have high solar reflectance index(SRI). It reflects the major portion of sunlight resulting in less energy consumption.

Sky Light

Natural light is allowed to enter the building to provide adequate illumination to every part of the building during the day.

Renewable Energy Compatibility

Kaizen Building enables to install electrical solar panels and solar water heaters on the rooftops helping customers in meeting there power requirement and results in less emissions.
